# STEEL RISER CLAMP

Riser Clamp

**Application:**

It is for pipe support in vertical runs of piping (risers) at each floor level. The devices are placed around the pipe and integral fasteners are then tightened to clamp them onto the pipe. The friction between the pipe and riser transfers the weight of the pipe through the riser to the building structure.

**Size Range:**

2" – 6"

**Material:**

Carbon steel

**Finish:**

Plain, Paint, Hot-Dip Galvanized with Zinc Plated Bolts & Nuts.

**Installation:**

Clamp is fitted and bolted preferably below a coupling, hub or welded lugs on steel pipe. Bolt torques is per industry standards. Clamp is designed for standard steel pipe O.D. and this must be considered in sizing the riser for other types of piping.

**Caution:**

This product is not intended for use with hanger rods.
